BUILT TO LAST GRIND & SEAL SYSTEMS BY RESINWERKS™

Experience a durable, stylish, and low-maintenance flooring solution that stands up to daily wear and tear while maintaining its pristine finish.

Clear Concrete Grind & Seal Systems

Enhance the natural beauty of concrete with Resinwerks™ Clear Sealer Systems, designed to deliver the look of polished concrete with superior chemical and abrasion resistance. These cost-effective solutions significantly improve the appearance and longevity of both new and existing concrete surfaces. Additionally, concrete can be stained prior to coating for a customized finish. Ideal for commercial and residential applications, our clear coating systems provide long-lasting protection and easy maintenance.

Superior Chemical & Stain Resistance

Unsealed concrete is highly porous, making it susceptible to permanent stains, moisture damage, and deterioration from oils and chemicals. A high-performance clear coating forms a protective, non-porous barrier that resists spills and contaminants, ensuring a more durable and easy-to-clean surface.

Advanced, Chemical-Resistant Flooring

Unlike traditional grind and seal systems, Resinwerks' clear coating solutions feature a primer application with Rapid H2O EP™ epoxy, ensuring maximum adhesion and a uniform finish. This advanced primer eliminates dark lines and inconsistencies caused by varying penetration rates or curing schedules. Rapid H2O EP™ dries quickly, allowing for re-coating within hours. Our systems are finished with HDC 100 Urethane, a high-performance topcoat that enhances chemical and abrasion resistance.

Enhanced Aesthetic with Heavier Build Systems

For those seeking a more polished and refined concrete finish, our LevelGuard EP self-leveling system offers a sleek, clean appearance while preserving the raw, industrial charm of concrete. This higher-build system enhances color depth and provides a durable, satin or glossy finish.

Effortless Maintenance & Cleaning

Treated floors are significantly easier to maintain compared to unsealed concrete. Dust, dirt, and spills can be quickly wiped away, preventing deep-set stains and wear. This makes Resinwerks' clear coatings an excellent choice for commercial spaces, retail environments, and garages.

About Us

Resinwerks manufactures sustainable industrial coatings that offer superior performance, quality, and value. Supported by a team of veteran resinous flooring professionals, we are committed to delivering the very best products to facility owners and our trusted contractor partners. Our products are manufactured domestically in the USA and conveniently shipped direct to you.

Sustainable Products

Our product line was designed from the ground up to focus on the latest in environmentally conscious resins and additives. In addition, we have largely substituted water for harsh solvents, making our products safer to use and better for our environment. For our clients, this means less hazardous emissions and superior long-term performance.
