

# SEAMLESS CHIP & FLAKE

## FLOORING SYSTEMS

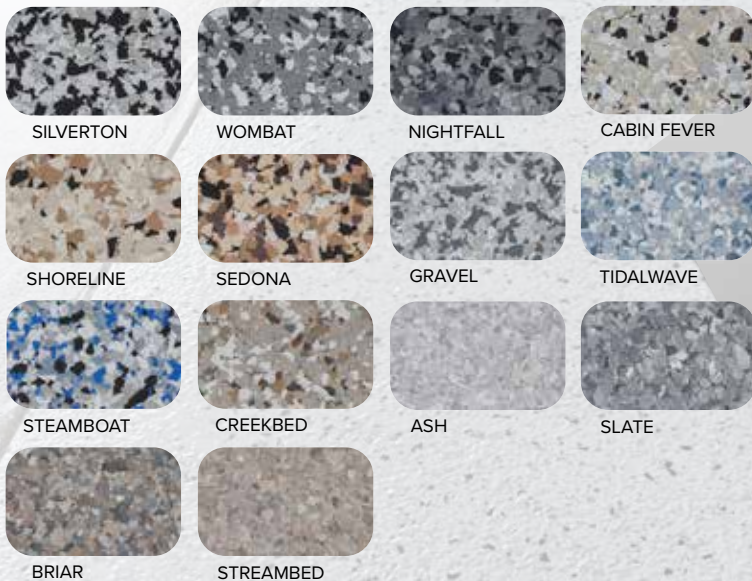

# DESCRIPTION

Resinwerks chip & flake flooring systems combine high-quality blended vinyl flakes with epoxy, polyaspartic and urethane resins to create highly functional and aesthetically pleasing floors. Ideal for all types of environments, seamless flake floor coatings offer a custom finish that can be designed to suit any space. Available with either a lightly textured or completely smooth surface, flake applications are easy to clean while offering excellent resistance to abrasion and long-term wear.

Owners can select from a variety of colors, blends and finishes. Also available in a simulated terrazzo flooring finish, providing a highly economical alternative to decorative terrazzo at a fraction of the cost.

## FEATURES AND BENEFITS:

- » Seamless, anti-microbial finish
- » Easy to maintain
- » Customized colors to compliment any environment
- » Highly chemical and abrasion resistant finish
- » Adjustable traction to meet specific COF requirements
- » Superior impact resistance

# FLOORING DESIGN

Seamless chip systems from Resinwerks can be built in a number of ways to suit both the requirements of the environment and the parameters of the installation. In general, these systems consist of a primer, vinyl flake broadcast, grout coat and topcoat.

Primers may consist of a variety of epoxy, polyurethane concrete or polyaspartic coating materials depending on project specific requirements. These products may be substituted to account for circumstances such as higher moisture vapor transmission rates in the concrete, existing substrate condition and project return to service requirements.

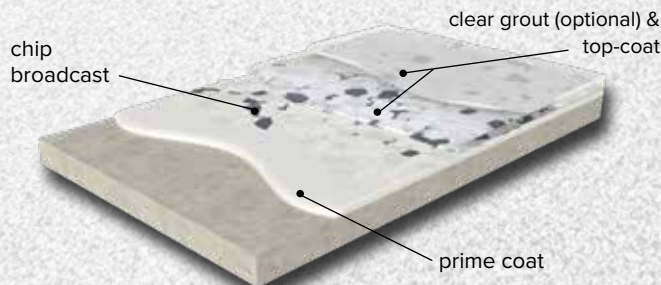

Grout coats and top-coats may be modified to allow for additional or less texture depending on the owner or specifier's preference. In addition, topcoats may also incorporate added levels of traction and have the capability to provide either a gloss, satin or matte finish.

## APPLICATIONS:

- › Car Dealership Service Bays & Drive Up Lanes
- › Residential & Commercial Garage Floors
- › Retail Spaces
- › Manufacturing Facilities
- › Locker Rooms & Restrooms
- › Stadiums

## SEAMLESS FLAKE SYSTEMS

EPX-F	Seamless commercial flake flooring system designed for light to medium duty environments. Available with multiple primer options and top-coated with a UV stable, chemical and abrasion resistant polyaspartic topcoat.
EPX-F-HD	Industrial epoxy flake broadcast system designed for larger areas. It incorporates pigmented 100% solids epoxy primer with our 100% solids clear cycloaliphatic epoxy grout coat and is finished with a high-traffic urethane finish.
KTX-F	Fast-Cure 2-coat seamless flake broadcast system available with multiple fast-cure primer options, including Vapor Barrier Epoxy. Topcoated with a high-performance polyaspartic topcoat. 1-Day installation with next-day return to service.
BioCem™ SLF	A hybrid Urethane Cement / Decorative Flake broadcast system engineered for applications requiring a self-leveling base coat and enhanced thermal shock performance. Ideal for industrial settings with a range of grout and finish options.

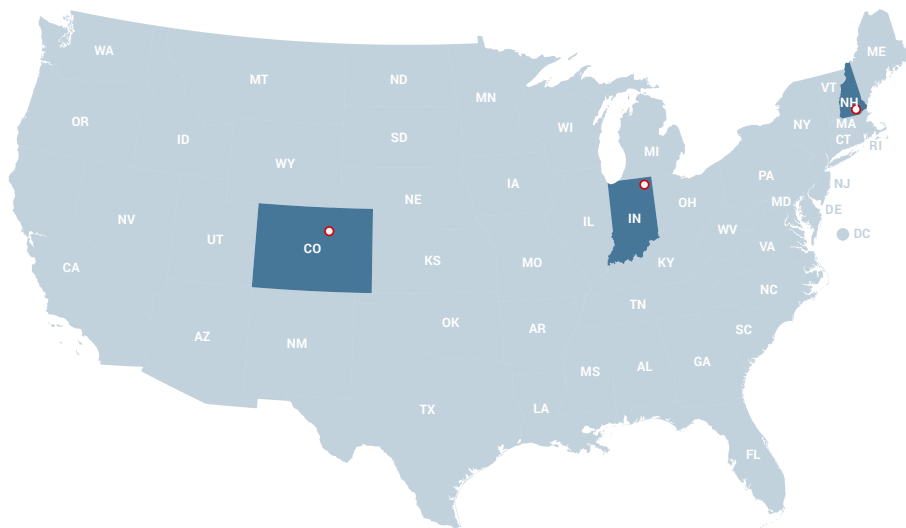

## **ABOUT US**

Resinwerks manufactures sustainable industrial coatings that offer superior performance, quality and value. Supported by a team of veteran resinous flooring professionals, we are committed to delivering the very best products to facility owners and our trusted contractor partners. Our products are manufactured domestically and conveniently shipped direct from one of our 3 sales and distribution centers.

## **SUSTAINABLE PRODUCTS**

Our product line was designed from the ground up to focus on the latest in environmentally conscious resins and additives. In addition, we have largely substituted water for harsh solvents, making our products safer to use and better for our environment. For our clients this means less hazardous emissions and superior long-term performance

Midwest Manufacturing, Western, Central & East Coast sales  
& Distribution Offices for convenient 1-2 day fulfillment Nationwide.
